

## AWS COST OPTIMISATION

Learn how you can leverage Cost Optimisation techniques to get the greatest value from your AWS resources

### AWS COST OPTIMISATION REVIEW

A key differentiator of Cloud is the ability to consume services on a pay per use basis. This paradigm shift enables organisations to change the way they procure, consume and think about designing their services, to continue to reduce their cost to serve the needs of their customers, internal and external to their organisation. In addition, the frequent release of cloud services and cost reductions requires a different behavior to solution design, focusing on driving continuous service review and improvement activities to keep pace over the classic project driven approach.

The Cost Optimisation Review is designed to analyse your AWS environments and provide prescriptive cost optimisation recommendations.

### LEVERAGING THE COST OPTIMISATION REVIEW

As an AWS Advanced consulting partner, Cevo are expertly trained to guide your team through this 1 week engagement. A Cevo Cloud Consultant will work closely with your Platform and Application teams to deliver actionable cost optimisation recommendations aligned to AWS recommended four areas of focus.

#### COST EFFECTIVE RESOURCES

Relates to the use of appropriate services, resources and configurations for your workload to drive cost savings

#### MATCHING SUPPLY & DEMAND

The closer your supply curve matches the demand for your services, the less over provisioning occurs resulting in optimised costs

#### EXPENDITURE AWARENESS

Understanding of business cost drivers to manage business costs effectively and identify cost optimisation opportunities. Focuses on the importance of cost visibility. If you can't see where you incur your costs, you can't save costs

#### OPTIMISING OVER TIME

Focus on the importance of continuous evaluation of new services and features against your service requirements to continue to identify cost optimisation opportunities

### WHAT ARE THE PRE-REQUISITES?

Identify a specific workload that requires an assessment. Cevo can help you identify a workload via an initial kick-off workshop.

Provide a Cevo Consultant with read only access to your billing and workload accounts.

### WHY IS IT HELPFUL?

Pressing issues with costs get identified and remediated quickly.

Get help realising the cost benefits of cloud and new cloud service and feature releases.

### WHAT DO YOU GET?

Within a week of the completed workshop you will receive a documented report which covers all aspects of the AWS Cost Optimisation focus areas. Cevo will provide you with actionable cost optimisation recommendations.

Engaging Cevo to provide a well-structured Cost Optimisation Review enables you to quickly action cost optimisation recommendations and implement mechanisms promoting continuous cost improvements.
