CLOUD MIGRATION BUSINESS CASE LITE

Safer, faster, predictable cloud migration for the small to medium enterprise

The use of modern Cloud technology services offer many promises. Done well, they can reduce technology cost & risk, while improving resilience, security, efficiency, transparency, agility & flexibility. Done badly, they can have the opposite effect, and even disrupt core business processes.

Cloud adoption poses a range of unique challenges to small to medium sized enterprises

The Cloud is a complex domain, and there are many factors to consider when deciding to adopt cloud technology, from choices of technology and migration approaches, through to ongoing operational and finance concerns. Even large technology focused enterprises have difficulty keeping up. For smaller enterprises who may be technologically dependent, but not technology focused, these challenges can be overwhelming. Cevo helps our clients - who span small startups to large multinationals - to leverage the best that the cloud has to offer in a pragmatic, results-based way. Based on our experiences, we have developed an offering to help Small to Medium sized enterprises as they embark on their cloud journey.

WHY CUSTOMERS CHOOSE THE CEVO MIGRATION BUISNESS CASE LITE ENGAGEMENT

This offering is relevant to your enterprise if you want to:

Understand the scope and vision for your cloud migration

Understand the tools, skills and assistance that you need to achieve this vision

Understand the likely Project costs and potential benefits of your migration

Understand the ongoing operational and financial implications of your vision

Collectively, this information will assist you with planning, decision making and will help you overcome Stakeholder skepticism.

The Engagement consists of a short project that is 2 weeks of effort spread across 6 weeks of elapsed time, structured as follows:

DISCOVER & PRIORITISE

We work with your team to understand the scope, business and technology capabilities and motivations of your business via a series of short, structured workshops.

MONITOR ON-PREM PERFORMANCE

We use discovery and monitoring tools to gather real performance data on your current environment and to enable us to simulate, size and optimise your cloud environment.

ANALYSE & REPORT

We analyse the performance data and then work with your team to develop an actionable migration plan and business case, then explore migration project funding opportunities with AWS.
